

Instructions for use of Disposal Guide logos

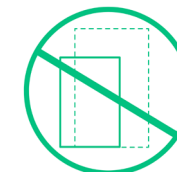

The most logical position for the logo is outside the mandatory text box that contains information on ingredients and nutritional values.

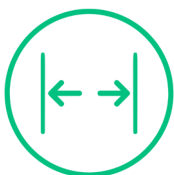

No alterations may be made to the logo.

The logo has a **standard height** of 10 mm. A logo height of 8 mm may be used on smaller packaging.

The **proportions** of the logo may not be changed.

Standard distances are used between the Disposal Guide logos for clear positioning:

8 mm logo – 1 mm between logos
10 mm logo – 1.25 mm between logos
12 mm logo – 1.50 mm between logos

The black part of the logo may be printed in any **colour**. A contrasting dark colour is preferable as it stands out and is easily legible. The logo itself is always white for this reason.

Multiple logos may be positioned from left to right or from top to bottom.

The logo is available in digital formats JPG and PNG.
